Professional Summary

Aspiring **MERN Stack Developer / Web Developer** (Fresher) with hands-on experience building and deploying responsive, cross-browser compatible web applications using **HTML5, CSS3, JavaScript (ES6+), React.js, Node.js, Express.js, and MongoDB**. Engineered **Chatly**, a full-stack real-time chat app live on Vercel and Render. Solved 200+ DSA problems; seeking an entry-level Frontend/MERN Stack Developer role to contribute and grow.

Education

Dr. A.P.J. Abdul Kalam Technical University (BIET), Lucknow 2022 – 2026
B.Tech in Computer Science Engineering

Gyanti Devi G.I.C, Ballia, UP 2021 – 2022
12th – Intermediate (Science)

Sri Naga Baba HSS, Ballia, UP 2019 – 2020
10th – High School

Training & Certifications

HCL Technologies – Technical Training Program (Hybrid), 2023–2024: software development fundamentals, Java programming, and industry best practices.

Internshala – Web Development Certification (Online), 2025: HTML5, CSS3, JavaScript, and foundational frontend engineering concepts.

Projects

Chatly – Real-Time Chat App | *React.js, Node.js, Express.js, MongoDB, Socket.io* Live

- Built a responsive, cross-browser chat interface handling concurrent real-time WebSocket connections via Socket.io – group chat, direct messages, voice/video messages, and read receipts.
- Designed component-based UI architecture across frontend and backend; integrated Cloudinary for media uploads and architected CORS/env configuration for Vercel + Render deployment.
- Delivered the application end-to-end from concept through production, debugging 10+ critical cross-browser and API integration issues.

Personal Portfolio | *React.js, HTML/CSS/JS, Tailwind CSS* Live

- Designed and built a responsive, cross-browser tested portfolio with particle backgrounds, typewriter effects, and 3D tilt interactions – built in both React and multi-file HTML/CSS/JS.

Weather Forecasting Application | *React.js, OpenWeather API, HTML, CSS, JavaScript*

- Built a responsive, mobile-first app consuming the OpenWeather REST API, displaying real-time temperature, humidity, and wind conditions with robust error handling.

Technical Skills

Core Web: HTML5, CSS3, JavaScript (ES6+), Responsive Design, Cross-Browser Compatibility

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, Vite

Backend & APIs: Node.js, Express.js, REST APIs, Socket.io, JWT, bcrypt

Database: MongoDB, Mongoose

Tools & Deployment: Git, GitHub, Vercel, Render, Cloudinary, Postman, Multer, Figma (basic)

Core CS: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Achievements

- 2nd Rank in college-level Java Programming Competition, Bansal Institute of Engineering & Technology.
- Solved 200+ DSA problems across competitive platforms; independently shipped & maintained a production web app (Vercel + Render) with full-cycle debugging and performance optimization.
